### Reviews

*It is great and fantastic. I actually have read and so i am certain that i am going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.*

*(Dr. Kayden Gerlach)*

## PAMPHLETS ON MEDICAL AND SURGICAL SUBJECTS

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 112 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . alone, the same size as the original dose. The morphin is never repeated except under the most extraordinary conditions. At the time the second dose is given, the patient is shown some familiar object, as a cup or spoon, which she recognizes, and in half an hour the same object is shown her and she is asked if she has seen it before. If she remembers, it shows she is not yet in the zone of amnesia, and a third dose of 1400 gr. or 13 the size of the first dose, is given three-quarters of an hour after the second dose. The memory test is again made in half an hour from the first test and usually the patient by this time cannot remember, and she is well in the zone of amnesia. From this time on, she can usually be kept in this zone by the repetition of the small doses, 1400 gr. at twohour intervals. The memory test is applied from time to time that the patient may not come into full consciousness before there is a repetition of the dose, as it is much more difficult to get a patient back into the semi-narcosis if she comes out of it, than it is to maintain her steadily in it. Other tests to determine the degree of narcosis are the pupillary reflex, the motor co-ordination and the Babinski reflex. The secondary manifestations such as the flushing of the face, dryness of the mouth...
